

# Command tracks

Put a coin on your current Command. At Rise, your maximum goes up by 1 (to 8 at most) and you refill. Spend by sliding the coin down.

# Round tracker

Move a coin after both players have taken a turn. From round 10, each player breaks one of their own shards at the start of their turn.

# Shield tokens

A champion holds at most one. Remove it instead of the champion being defeated.

# This-turn markers

Optional reminders for Scorch and Might boosts. Clear them all at the end of each turn.
